

Lunuli's SALT CRYSTALS

Create your own
magical crystal treasures!

You need:

approx. 100 ml
hot water

approx. 35–40 g
salt

a glass

yarn or
cotton string

pencil or
wooden dowel

optional:
food coloring

optional: beads or
pipe cleaners

Here's how:

1 Make the salt water:

Pour hot water into the glass and slowly stir in the salt. Keep adding salt until a little bit no longer dissolves at the bottom.

2 Prepare the string:

Tie one end of the string to a pencil and place the pencil across the top of the glass. The string should hang in the water but not touch the bottom.

3 Start the magic:

Place the glass in a quiet place and don't move it anymore.

4 Wait and watch:

As the water slowly evaporates, salt crystals will form on the string.

After 1–3 days you can see the first crystals.

5 Lunuli's magic:

Add a few drops of food coloring to try growing colorful crystals.

Important notes:

- ★ The water is hot – please ask an adult for help.
- ★ The crystals are not for eating.
- ★ Be patient – the most beautiful crystals take a little time.

Have fun
wondering, waiting
and discovering!
